IN THE CLAIMS:

Please **cancel claims 1-13**, and **add claims 14-24** as follows:

1-13. (*Cancelled*)

14. (*New*) A method of consuming content located at a network address, comprising the steps of:

connecting to a user interface a portable memory where the address is stored;

connecting the network address to the user interface and manifesting the content to a user by operating the user interface;

upon navigating to a given point in the content, ceasing to consume the content and causing the user interface to record data indicative of the aforesaid point on the portable memory;

subsequently reconnecting the portable memory to the user interface and using the address and the data stored on the portable memory, connecting to the address, and navigating directly to the aforesaid point of the content, the connecting and navigating steps and being performed by operating the user interface.

15. (*New*) A method according to claim **14,** wherein the content is text, and the data includes an indication of the point in the text where a user stopped reading.

16. (*New*) A method according to claim **14,** wherein the content is music, and the data includes an indication of the point in the music where a user stopped listening.

17. (*New*) A method according to claim **14,** wherein the content is stored on a server accessible via the Internet and the address is a URL.

18. (*New*) Apparatus for enabling consumption of content located at an address in a network comprising:

a user interface operable to navigate to the address and manifest the content to a user; and

a portable memory releasably connectable to the user interface, the portable memory being arranged to store the address and the user interface being operable to:

receive a command from a user to cease consuming the content;

record, within the portable memory and in response to receipt of the command, data indicative of a point in the content where the command was received;

receive a further command from a user to read the address and the data from the portable memory; and

connect to the content and navigate directly to the point in the content by using the address and the data.

19. (*New*) Apparatus according to claim **18**, wherein the content is selected from the group consisting of text and music.

20. (*New*) Apparatus according to claim **19**, wherein the address is a URL.

21. (*New*) Apparatus according to claim **20**, wherein the data additionally includes preferred parameters relating to format in which the content is preferably manifest to a user.

22. (*New*) Apparatus according to claim **21**, wherein the content is text, and the preferred parameters include at least one of font size, font type, and layout.

23. (*New*) Apparatus according to claim **18**, wherein the content is text, and the preferred parameters include at least one of font size, font type, and layout.

24. (*New*) Apparatus according to claim **18**, wherein the address is a URL.
